

enlightenment

Wheel Size: 29
 Material: Carbon
 Color:  Grey/Carbon

Perhaps your path to enlightenment lies along a twisty singletrack at 180 beats per minute. If so, it's time to emancipate your mind and body from your daily languor. The Enlightenment 29 was designed for exactly that, with maximum power transfer and lightness to help you on your quest for speed.

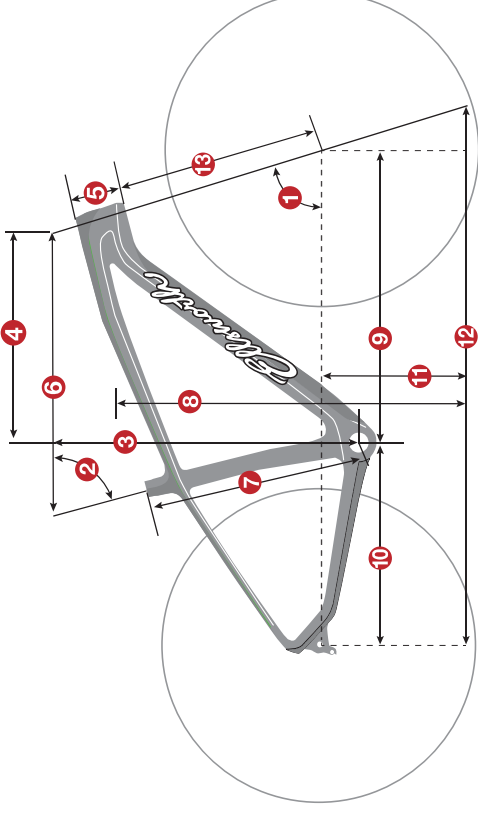

The Enlightenment 29 foundation is a carbon fiber frame that is sturdy enough for rugged trail conditions, yet light enough for race day. The just-right blend of World Cup style nimble handling and stability has cemented its legacy, and this is what gives you the confidence to hammer through sinuous trails with short sightlines.

Modern features include hassle-free, fully internal cable routing, tapered headtube, and BB92 pressfit bottom bracket shell. The Enlightenment 29 takes a high-direct mount front derailleur, a 31.6mm seat-

post, and a 12x142mm thru-axle rear hub. Complete bikes are available with Shimano XTR, XT, and SLX in both 1x and 2x configurations as well as a SRAM XO1 1x build. The frameset comes with a Cane Creek 1-1/8" - 1-1/2" semi-integrated headset and a Shimano 12x142mm rear thru-axle. It is recommended for use with a 100mm front suspension fork.

Seek and enjoy.
